10,000 Hours Rule

- The **10,000-Hours Rule** states that every sustained success have invested minimum 10,000 hours in their career/craft.

Do you know who wrote much of the software that allows you to access the internet?

Bill Joy

10,000 Hours Rule

Bill Joy co-founded the Silicon Valley firm Sun Microsystem. It became the most critical player in the Computer Revolution.

Among Silicon Valley insiders, Bill Joy is spoken of with as much awe as someone like Bill Gates of Microsoft.

He is sometimes called the Edison of the Internet.

10,000 Hours Rule

When he was interviewed, and an analysis was done on the number of hours he has spent coding, it came to a little over 10,000 hours.

The neurologist Daniel Levitin writes, “the emerging picture from such studies is that ten thousand hours of practice is required to achieve the level of mastery associated with being a world-class expert in anything.”

TO OUR PARENTS, TEACHERS & GUARDIANS:

WHAT YOU NEED TO LEAD IN THE VUCA WORLD.

1. Psychological Safety

Psychological Safety

A psychologically safe environment is created when parents, teachers, or those in positions of authority permit children, students, or subordinates to express their voices.

They create environment where everyone is able to:

- ~ Ask questions
- ~ Admit weakness or mistakes
- ~ Offer ideas
- ~ Critique the status quo

Psychological safety is not:

- ~ Being nice
- ~ A guarantee that all your ideas will be applauded
- ~ A freedom from conflict: In psychological safe spaces, people are willing to disagree. They are willing to debate.

G-Factor

Lean on, trust in, and be confident in the Lord with all your heart and mind and do not rely on your own insight or understanding. In all your ways know, recognize, and acknowledge Him, and He will direct and make straight and plain your paths.
